

# About Our Gold Class® Shop

Gold Class is the industry standard for training that contributes to complete and safe repairs. Our shop is among only 10 percent of collision repair shops to meet this rigorous standard.

As a Gold Class shop, we are required to train each of our repair technicians every year, and to have in-house experts in each repair specialty needed for a complete and safe repair.

We commit to Gold Class training.  
Because we're committed to your safety.

## All Collision Repair Shops Are **NOT** the Same

Because safety matters.

If you've been in an accident, how  
will you know if your vehicle has been  
completely and safely repaired?

## What You See...

## What A Gold Class® Shop ALSO Sees...

Crumpled hood.

Front bumper missing.

Broken headlight.

Restraint system inspection needed to ensure proper function.

Three-dimensional measuring needed to ensure the vehicle structure is correct.

Damaged suspension parts that compromise safety.

Your vehicle may “look” the same when it’s repaired after an accident, but it may not be as safe to drive.

## So how do you know?

Our Gold Class shop knows.

When you bring your vehicle to our Gold Class shop, you can be confident our technicians have been trained on:

- ▶ How and where to look for hidden damage that you may not see
- ▶ What can be safely repaired and what needs to be replaced
- ▶ How to inspect and repair air bags and seat belts
- ▶ Current vehicle technologies and repair techniques

Don't guess. Choose our Gold Class trained repair professionals for your collision repair, and recommend us to your friends and family too.

Because safety matters.
